## BOW ISLAND

From our own Correspondent

Mr. Fred Newham of Timpion, Mexico, is paying a visit to Mr. and Mrs. Maurice Berton. Mr. Newham leaves for England on the 11th of September.

Mrs. A. Ostrum returned home last Sunday.

Mr. and Mrs. W. Currie of Good Cheer have for their guest Mr. and Mrs. J.F. Parker of Calgary.

Master Earl and Grace Gillette two young travellers returned to their home at Whitla last Saturday on the evening train after spending a week visiting their cousin, auntie and uncle Alfred E. Adair north of town and Grandmas.

Constable Reid of Medicine Hat arrived at Bow Island last Wednesday to relieve Constable Bradner.

Mr. M.H. Smith and Mr. Hillis motored to Medicine Hat to see the ball game played between Monarch and Winnipeg Giants, they report it is a game well worth seeing.

Mrs. Wm. Adair left Tuesday evening to attend to some threshing on her farm. Good luck are the wishes of her many friends.

## N-O-T-I-C-E

There will be a meeting held in the G.W.V.A. Club Rooms (old Union Bank building), Bow Island for the purpose of organizing a Ladies Auxiliary, any lady who had a close relationship with service women, eligible to join. The Ladies Auxiliary would be pleased to have all who could attend at the Club Rooms on Saturday 4th, at the hour of 3 p.m. for the purpose of organizing.

Mrs. Saunders from Whitla was here last week for a few days helping her daughter Mrs. Campion at the Cote Restaurant.

Mr. Milroy returned home last Wednesday from his vacation and reports having a good time.

Duck shooting season is here again and ducks are in evidence, a lad of about 17 shot 21 last Wednesday morning.

Constable Bradner and his wife started for the mountains enroute to B.C. yesterday Thursday.

Mrs. A. Ostrum paid Mrs. Bradner a short visit last Tuesday afternoon.

Miss Edie Roberts was on business here last Tuesday.

## St. Michael's Church

Mass will be celebrated on Sunday 4th, September at 9:30 a.m.

Jack Houghlin is back in town again looking after his dogs.

## NOTICE

U.F.A. and U.F.W.A.  
Pres. I.D. James Pres. Mrs. James  
Will meet on Saturday  
September 11th.

General Business  
Sec. G. Monds. Sec. Mrs. McGregor

## Auction Sale

Don't forget the sale at Mrs. Foot's Farm on S. E. 1/4 24-9-12 on Wednesday 8th, September.

## Police Court News

From our own Correspondent

Constable Bradner received a phone message from Lethbridge last Monday afternoon to stop and arrest a man who had stolen a Ford Car from Mr. McPherson of Lethbridge. Constable Bradner directly phoned to "Mr. Johnson J.P. of Burdett and gave him the number of the car. Mr. Johnson just walked down the street a few paces and there at the pump was the man, Mr. Johnson held the car and arrested the man, then very nicely secured him behind the coil here at Burdett. After he was arrested he stated that he did not know why they had arrested him for he was employed by the owner of the car, which was under going repair, he stated that Mr. McPherson told him to try the car out and that he did not steal the car at all, he was simply trying it out and while doing so struck out for Burdett enroute to Bow Island, the car evidently had been up against a severe storm as the front axle was badly broken and the self starter was out of commission which had to be repaired at Burdett, Constable Bradner received a phone message to say that he had to escort the prisoner back with the car to Lethbridge at the time of writing it is not known what time prisoner and police left Burdett for Lethbridge but a telegram to Mrs. Bradner on Tuesday morning, stated that they did not arrive at Lethbridge until 11:45 p.m. Monday night.

Re. Alphonse Baur known as Frenchie, alleged car theft came up for trial last Tuesday before H.P. Barrett J.P., prisoner stated that he had no intention of stealing the car he was trying it out, and so he drove to Burdett to see his girl where upon Mr. McPherson with drew the case.

## The Weather

### August & September

Friday 27th. Hot part of the day, cooler & cloudy at night.  
Saturday 28th. Cool and cloudy, High wind in the afternoon.  
Sunday 10th. Dull and Cool.  
Monday 30th. Colder, some rain.  
Tuesday 31st. Dull, with rain in evening.

## SEPTEMBER

Wednesday 1st. Cloudy and Cool.  
Thursday 2nd. Sunny with a nice breeze.

## It Is Not Enough

to have the bowels move. It is more important to persuade liver, kidneys, skin, and bowels to act in harmony and against self-poisoning. BEECHAM'S PILLS act favorably upon all organs concerned in food-digestion and waste-elimination; they remove causes as well as relieve symptoms.

## BEECHAM'S PILLS

Worth a Guinea a box.

Sold everywhere in Canada. In boxes, 25c., 50c.

### Passing Events

Second only to the perverted view held by a vast majority of people that the chief aim in life is the amassing of wealth and the enjoyment of those fleeting pleasure and luxuries which money can procure, is the possibility of the public in snatching at get-rich-quick schemes which unscrupulous but clever promoters and swindlers dangle before the credulous. It is not that there is something fine and noble in work itself, in worthy ambitions realized, in service well rendered, and that a monetary reward which the be-all and end-all of existence appears to be fast dying out, and a person's success or failure in life has come to be measured by the standard of his success in amassing money. It is a false standard and an unsatisfactory one. The truly successful men of the world are those who can point with conscious pride to some real achievement benefiting themselves and their fellow men.

The desire to get money not honestly earned—which can only be gained by one individual through the loss by some other individual—and to get it quickly and without effort is the bait used on every trap set for the money, and for every one who does obtain wealth in this ill-gotten way there are hundreds of victims who lose. The latest example is afforded by the operations of a man named Conzel, at Boston, who promised to pay 50 percent profit in ninety days on monies invested with him. Thousands of people entrusted him with their money to a total of many millions of dollars. Now he is bankrupt and in prison, while his victims are sadder, but it is doubtful if they are wiser. The only safe road to wealth is along the cultivation and practice of habits of industry, frugality, perseverance and care. And even this road may not lead to the desired haven. But if it does not, there need be no regrets for travelling along any road a person will at least have the satisfaction of accomplishing something, and leaving the world better than he found it.

Indications as to the relative degree of activity prevailing in business circles in Eastern and Western Canada are shown by various statistical tables for the month of July last, and these reveal the fact that, while development in the East is only about half its own with last year, in the West very marked strides forward are being made. Building permits issued in July in 26 Eastern cities totalled \$7,242,536 as compared with \$6,919,444 in July, 1919, an increase of only \$271,495, whereas in fourteen Western cities permits issued amounted to \$5,098,630 as compared with \$1,726,993 a year ago, or an increase of \$3,371,637.

Several large Eastern manufacturing concerns have shut down portions of their plants temporarily, or have reduced their staffs, thus throwing considerable number of men out of employment, one firm alone, which has run three shifts of workers for the past nine months, cutting the num-

ber to two and releasing 600 men from employment.

On the other hand, the annual influx of harvest hands into the West has brought thousands of young men here, and the banks are anticipating the need of generous assistance from the federal government in the task of financing the marketing and transportation of the 1920 grain crop which promises to be the best for some years past.

### Guilty of Assassination

A man, razor in hand, was caught by the wife assassinating not an enemy, but a corn—what he needed was Putnam's Corn Extractor's safe, painless and cures. Try "Putnam's"—cures so fast, 25c. at all dealers.

### A Shocking Tragedy

Three Hundred Patients on Hospital Ship are Drowned

Particulars have reached Stockholm of a terrible catastrophe which occurred on the Neva recently, when a hospital ship sank with 1,200 spotted typhus patients on board. It was fired at \$500,000,000. The patients were locked up in their cabins. Before the ship sank it was plundered by the Bolsheviks, who unconcernedly left the patients to their fate. About 300 are believed to have been drowned. Nothing is mentioned of the matter in the Bolshevik papers except that 200 of the crew perished.

### Minard's Liniment For Dandruff.

New Canadian Warships

Cable advice received at Ottawa by the Naval Department state that the cruiser Aurora, and the destroyer Patriot and Patrician, will be in commission October 1, and will in all probability proceed to Canada in the week following. These three vessels, together with two submarines now in Canadian waters, comprise Canada's new fleet.

Bulano, an Italian painter, drew caricatures in the fourteenth century. He painted the saints with sentences to the mouths of his figures.

There are 400,000 cafes in France—one for each ninety inhabitants.

There are many brands of tea and coffee—you take your chances on quality—and you pay the price.

But there is only one brand of

## INSTANT POSTUM

—invariably high in quality and invariably moderate in price. A Fair Trial Tells.

Canadian Postum Cereal Co. Ltd., Windsor, Ont.

### Keep Thin in Middle Age

Compulsion May be Reduced by Abstaining from Fat Meats

Attending to the bulk of the body in middle age is risky. This does not mean that the diet should be Spartan. It must be simple and moderate. Fastidious diets tempt stout people to eat too freely. Compulsion may be reduced by abstaining from fat meats, sugar, soups and pastry. Bread and potatoes should be eaten rather sparingly. Fresh fruit and green vegetables may be taken in moderation. No sedentary middle-aged person can eat luxuriously without endangering his health and curtailing the span of years. The diet must be plain and digestible, and the quantity eaten limited strictly to the repair of tissue expended in work.

## MOTHER!

"California Syrup of Figs"  
Child's Best Laxative

Accept "California Syrup of Figs" only—look for the name California on the package, then you are sure your child is having the best and most harmless laxative of which he is capable. Full directions for child's dose on each bottle. Give it without fear. "You must say 'California'."

### Belgians Are Doing Well

Every Inch of Soil is Cultivated and Crops are Bountiful

The British Mission at Spa was astonished at the smiling prosperity of Belgium. Every inch of soil is cultivated, and the crops are bountiful. Indeed, one might well learn a lesson from the Belgians in the use of the land. It may safely be said that Belgium every single foot of land is utilized to the fullest extent.

Buildings of all sorts are in splendid order. More coal is being produced than before the war; the people are working hard; there is a great deal of enterprise, and, generally speaking, Belgian industries are thriving in a remarkable way.

The Belgians are to receive eight percent of the war indemnity. It is fixed at \$500,000,000. They may hope to receive \$480,000,000, in addition to which they are to have first charge over the first hundred millions of their share.

In other words, every Belgian will get about \$60 per head war indemnity. To the Belgians, in proportion to their numbers, are accounted the richest people in Europe.

### KEEP CHILDREN WELL DURING HOT WEATHER

Every mother knows how small the hot summer months are to fatal children. Cholera infantum, diarrhoea, dysentery, colic and stomach troubles are rife at this time and often a precious little life is lost after only a few hours' illness. The mother who keeps Baby's Own Tablets in the house feels safe. The occasional use of the Tablets prevents stomach and bowel trouble, or if trouble comes and the Tablets will bring baby safely through. They are sold by medicine dealers or by mail at 25 cents a box from the Williams' Medicine Co., Brockville, Ont.

Vanderbilt Buys an Island

Cornelius Vanderbilt, Jr., states that he has purchased for his wife an island in Sprout Lake, near Alberni, Vancouver Island. He intends to construct a hunting lodge at which he and his wife will spend vacations.

Saves Three Lives

George Blanton is to be recommended for the Honorary society medal, for having saved the life of two bathers at Nobel, Ont. It is also stated he saved another life at Sault Ste. Marie some weeks ago.

When a woman can't get a servant to do her work there is no help for it.

Minard's Liniment For Sale Everywhere.

### Perfected Aeroplane To Explore Africa

Easily Attains Speed of A Hundred Miles an Hour

A new type of hydro-aeroplane, operated by three helices, has been completed and will be marketed soon by J. H. Latham, son of Hubert Latham, who two years before the war met his death while hunting in the Congo.

Scientists here prophesy that Mr. Latham's invention will greatly facilitate exploration work in the interior of France's colonies, as it combines three great factors—speed, carrying power and comparative lightness of equipment of the machine. It is able to use the smallest streams in case of accident.

The cabin contains room for four passengers, as well as compartments for reserve supplies of petrol, food, wireless apparatus and machine guns, all of which are in a light bark canoe body. All the machinery for the operation of the craft is above the heads of the passengers.

In trial tests the hydroplane, carrying three tons, mounted half a mile in four minutes, a mile in eight minutes and three miles in thirty-four minutes. The speed test showed a maximum of a hundred miles an hour, which was easily attained.

### Movie of Hudson Bay Country

The great naval airplanes of the Canadian Aero Film Company has left on an 800 mile trip to Hudson Bay, where pictures will be taken for the provincial government and a survey made for the Dominion Government. The plane is bound for Belcher Island on the west coast of Labrador in the Bay, and stops are being made at North Bay, Cochrane and Moose Factory.

### Less Employment in East

Reports Indicate, However, That the Labor Market Firm on Prairies

Reports from over 5,000 employers to the Dominion headquarters of the Employment Service of Canada, department of Labor, indicates that, disregarding loss of time due to strikes, there was a decline in the volume of employment during the week ending July 3, as compared with similar reports covering the previous week. A decrease had been expected, but not such a large one. "For the following week, however, these firms anticipated making substantial additions to their rolls."

The three Prairie provinces were the only ones to record an increase, while among the declines Ontario had the biggest. The best increases were in railway construction work, edible plant products, and building construction. Further reductions were expected. Large reductions were among the firms manufacturing rubber goods and iron, steel and lumber products.

A slight decrease in placements by the employment service is recorded by the department for the week ending July 31, as compared with the previous week.

### High Prices at Cattle Fair

The Brandon Cattle Fair, which is usual success and bidding was keen and prices high. The highest price, Aberdeen Angus, "Blackbird of Glenbrook," brought \$3,000, and won the Female Grand Championship. The animal was retained to Canada by a Bowden, Alta., ranger. In all 45 Aberdeen Angus and 48 Shorthorns were sold.

No surgical operation is necessary in removing corns if Holloway's Corn Cure is used.

Externally or Internally, it is Good.—When applied externally by brisk rubbing, Dr. Thomas' Eucalypti Oil opens the pores and penetrates the tissue as few liniments do, touching the seat of the trouble and immediately affording relief. Administered internally, it will still the irritation in the throat which induces coughing and will cure affections of the bronchial tubes and respiratory organs. Try it and be convinced.

The Imperial canal of China has a length of more than 1,000 miles.

### Use for 70 Years

Then is use Grandmother's youthful appearance has remained until youth has become but a memory. The soft, refined, youthful white appearance is the result of the use of Beauty with you for many years.

Gouraud's Oriental Cream

W. N. U. 1331.

## AVOID ALUM IN FOOD

Baking Powder is one of the most important food ingredients. Alum or other injurious acids are frequently used by some concerns to lower the cost of production.

## MAGIC BAKING POWDER

It is a pure phosphate baking powder and is guaranteed to be the best, purest and most healthful baking powder possible to produce.

W. Matthew Williams, in "Chemistry of Cooking," says: "Phosphates are the bone-making material of food and have something to do with building up of brain and nervous matter."

Made in Canada

### Western Men Appointed

The following western men have been appointed authorized trustees under the bankruptcy act: Saskatchewan—Executors and Administrators, Trust Co. Ltd., Moose Jaw; Alberta—J. G. Edgar, Calgary; British Columbia—R. M. Ellis, Vancouver.

### Poor Man's Advantage

The poor man has more hope than the rich. The poor man may have no dinner today, but he hopes he may have one tomorrow; but the rich man, who has all and more than he wants today, and is discontented, can hardly hope for more tomorrow.

## The Roast Beef of England

KEEN'S D.S.F. MUSTARD is largely associated with the fame of England's roast beef, having been used with it for over a century.

### Keen's D.S.F. Mustard

eaten with roast beef and other meats, fish, game, poultry, cheese, etc., causes better digestion, and assures full nutrition. It has received the highest awards at exhibitions all over the world.

MACOR, SON & CO., Limited, Montreal, Toronto, Canadian Agents.

## PARTRIDGE TIRES

Game as Their Name

### Just Imagine

The delicious preserve you would make if you could walk out into an orchard of One Hundred Acres of ripe, luscious fruit, and pick the choicest, using nothing with it but pure cane sugar, and it is, in addition, you had the most scientific machinery to turn it out—what you think your jam would be just about perfect? This is just how

### E. D. SMITH & SONS, Limited

They were the first to make Pure Jam in Canada, and are still leading in popularity. Try a tin of their various strawberry. It is delicious. Ask your grocer for The Maple Leaf brand.

# Wheat Control Ends And Prices Based on Market Conditions

Ottawa.—With the going out of existence of the wheat control board the business of buying and selling Canada's most important agricultural product will once more become the business of private firms and individuals. With the passing of the board there will also come to an end the fixing of prices for flour and wheat, and there is considerable speculation as to what the immediate effect of the restoration of the old order of things, with prices based upon market conditions will be.

The government's decision to do away with the wheat board which handled the 1919 wheat crop on the basis of a fixed initial price, plus what the market would bring, has been taken in the face of considerable opposition.

The explanation of the peculiar situation doubles the fact that what wheat control worked out more successfully and realized for the farmers more for the grain than they thought it would, and the result that this autumn they have in many cases expected a preference for the attitude of the government is, that under existing conditions not purchasing immense quantities jointly, it is not thought inevitable that control should be maintained.

It has been pointed out, however, that at the last session of parliament power was taken to re-constitute the board for the 1920 crop so it is deemed necessary to do so. It is understood that the government has given to grain growing interests that should a situation develop that would warrant the reconstitution of the wheat board, the government would not hesitate to act. It is not anticipated that such action will be taken. Recent cables from overseas have stated that the royal commission, which supplies for Great Britain, wheat in past years has made its arrangements with the Canadian wheat board for its purchases, who in turn will purchase from Canadian producers. An interesting statement is that Great Britain is that the bread subsidy paid by the government has been removed, and bread prices will not, it is said, be increased. It is predicted that prices obtained for wheat in the British market this year will be practically the same as were paid for the 1919 crop.

## Harvesting the Wheat Crop

Binder and Thresher Hand from One End of the West to the Other.

Winnipeg.—Assisted by 30,000 harvesters from eastern Canada and the prairie provinces are taking off their crops. The bound of the binder and the thresher is heard from one end of the country to the other, according to a report of the Canadian National railways dealing with conditions along their lines.

Most points send favorable reports. There appears to have been little damage from hail and rust, and only one or two points report any damage from frost. Generally, speaking, the weather is favorable for harvesting, and for the ripening of the grain crops.

Points in Manitoba report that great progress has been made in getting up to the end of last week, and threshing was general. In some districts cutting was completed, in others from 15 to 50 per cent. The work was done. Erickson reports a large acreage destroyed by fire. Reports coming in show wheat to be in excellent condition. The cutting is in full swing, and threshing has commenced in many places, except in a few points where rain has delayed the harvesting.

Prices Reach the Limit  
Toronto.—In addition to about 250 wholesale grocers from various points in the Dominion at the opening of the annual meeting of the Canadian Wholesale Grocers' association here, there were also present twenty representatives of manufacturers from that class who are allied to the grocery jobbing trade.

Hugh Blair, of this city, president of the association, stated that he believed prices of necessities had reached the peak, unless further demands from workmen for increased wages were made. He denied that the association was a combine, as had been alleged before the board of commerce.

## Cox Makes Charges

Accuses Republicans with Conspiracy To Buy Presidency  
Pittsburgh.—Information to support his charges that a Republican campaign fund of \$15,000,000 was being raised "in a conspiracy to buy the presidency," was presented by Governor Cox, of Ohio, Democratic presidential candidate, in "addressing a public meeting here.

Governor Cox's data consisted almost entirely of material taken from a letter written by Fred W. Latham, Chicago, treasurer of the Republican national committee, but his exhibit was a typewritten list purporting to show Republican campaign supporters' contributions from 27 states and aggregating \$8,445,000. Names of local subscribers, Governor Cox said, were ordered kept quiet. These quotas, given as \$2,000,000 for New York city, \$500,000 for Philadelphia, and ranging down to \$5,000 for smaller cities like Albany, N.Y., were said by the governor to have been announced about the middle of July.

Sheets bearing the 51 cities' quotas were "distributed" to those assembled at the public meeting, and the alleged quota lists, but did not state how or when it was acquired. The quota plan, he said, was carried out like that of the Liberty loan campaign.

## Foch Not Visiting U.S.

Strasbourg, Alsace-Lorraine.—Dr. Marcellin Foch, former chief of the French high commission to the United States denied on behalf of Marshal Foch that the latter plan to visit the United States April, as announced by some of the newspapers.

## Horse Artillery Brigade

Vancouver.—The military authorities have taken possession of the horse show building on Grand, in order to prepare for the permanent home of the 150th brigade of field artillery.

It was stated by a leading military expert who had just returned from a tour of observation through the west that the military costs of bread depended largely upon the stocks of flour in the hands of the mills and bakers. This flour had been sold at a profit, and it was within a short time there might be developments that would ease the situation for the bread winner and eaters.

It was stated by a leading military expert who had just returned from a tour of observation through the west that the military costs of bread depended largely upon the stocks of flour in the hands of the mills and bakers. This flour had been sold at a profit, and it was within a short time there might be developments that would ease the situation for the bread winner and eaters.

The wheat board, it was stated, would go out of existence on August 31, and then business will return to its normal conditions, as in previous years. Big milling firms buying in competition and selling in the same way, with no fixed prices beyond the market quotations.

## Dates for Tariff Commission

Ottawa.—The official itinerary of the tariff enquiry commission, covering the four western provinces and Ontario as far east as Windsor, provides for fourteen sittings on the other side of the Great Lakes. The itinerary announced is as follows: Winnipeg, Sept. 14; Medicine Hat, 17th; Vancouver, 20th; Victoria, 22nd; Vancouver, 24th; Vernon, 27th; Nelson, 30th; Calgary, Oct. 1st; Edmonton, 3rd; Saskatoon, 8th; Regina, 11th; Brandon, 13th; Winnipeg, 14th; Fort William and Sault Ste. Marie, 18th; Windsor, 21st.

## Prices Due For A Fall

Washington.—Retail prices, in the opinion of the federal reserve board, will decline slightly during the coming fall and winter months, and will slump next spring to still lower levels.

Changes in the prices of raw materials which were reported to have declined sharply during the past few weeks, will not show their effect, according to the board, in retail prices until early next spring.

## Manitobans Are Destroyed

London.—British tank and hydro planes valued at nearly £2,000,000, which were recently confiscated by the entente commission in the Pilsen case, were destroyed by the 3,000 employees of the plant, many of whom are communists, in a Berlin dispatch to the London Times.

The reichswart was summoned out, but proved powerless to act. The British consuls have declined on strict adherence to the 44-hour work.

## British Columbia

Victoria.—Names placed on the provincial voters' lists as a result of the recent census are numbered 202,495 or 45,000 more than the total of 1919.

Victoria, B. C.—So far this season there have been 754 forest fires in British Columbia according to the government more than \$7,588, according to the 1919-20 fire report issued by the government. "Conditions are more improved, but are still dangerous," the report says.

## Turgeon Speaks at Regina

Critiques Present Government And Premier's Speech At Stirling

Regina.—Hon. W. F. A. Turgeon addressed a large gathering here on the question of the tariff, dealing particularly with Premier Meighen's recent speech at Stirling, Ont. Mr. Turgeon spoke for two hours and was accorded a good hearing. He took the stand that the premier's speech was a direct challenge to the west on the tariff issue, and strongly criticized the new government's position. "Mr. Meighen says he stands among his followers those who stand by British institutions and things of that sort," said Mr. Turgeon, "and on the other hand he sees those who would destroy them, wreckers, as he says. I do not agree with Mr. Meighen at all. On the important thing which is the meat of his discourse, on the question to which all three things lead—that is to say the tariff policy of Canada—I do not agree with him at all. I feel I am just as much attached and just as loyal, and so are those around me, to British institutions and methods and forms of government as Mr. Meighen; just as much and just as more attached to that most fundamental of all British government—representative government and faith in the people. That, perhaps, is the outstanding characteristic of the government of the day. Why does it not touch the people? We all know how the members of that government came into being in 1917 for a specific purpose. There was a full understanding that the purpose being accomplished, that government would come to an end. Has it? The mandate has long expired. On what authority is the present government carrying on? Mr. Meighen admits they are carrying on. He says we are not a new creation, we are born and bred from the old government, a continuation of the same regime; we are carrying on. Under what mandate? Mr. Meighen tells of British institutions and methods. Does he imagine for one moment such a state of affairs exists in England? The government there goes to the people when they know their mandates have expired."

## The Polish Victory

Eighty Thousand Reds Captured and Forty Thousand Killed

Paris.—The foreign minister has announced that France has conspired Poland to attain the best strategic military position possible until peace is signed regardless of her ethnic and racial differences. The military situation will influence the peace terms. France has advised Poland, through the talks of British institutions and methods. Does he imagine for one moment such a state of affairs exists in England? The government there goes to the people when they know their mandates have expired."

Polish victory against Polish forces along the Polish coast of Warsaw is not expected at least for the present by General Weygand, who is credited with having directed the advance of the Polish army back from Danzig according to the Warsaw correspondent of the Petit Parisien.

General Weygand is quoted as saying the Poles should not advance too far eastward. Bill should stretch themselves along a line that should be easily held, so that they may be able to resist any effort on the part of the Reds to bring back their forces against them in the future.

## Unemployment in East

Hamilton, Ont.—There is more unemployment in this city than for many months. Many men are coming here from outside points seeking for work, but without success. It is said that there is even some for help from the federal government for in offices and factories, but the supply of domestics is below the demand.

## Meighen to Speak at Sherbrooke

Sherbrooke, Que.—Premier Meighen will be invited to address a meeting here some time next month, it was decided at a caucus of the executives of the eastern townships. The Conservative association here, Hon. C. J. Doherty, minister of justice accepted the invitation that the premier would accept the invitation.

W. N. U. 1331.

# Mob Creates Havoc in Sinn Fein Riots In Belfast District

## IRISH PROBLEMS BEYOND THE HELP OF ANY PARTY

Ottawa.—That no individual, institution or party in Ireland now can ride the whirlwind which has been stirred up there and bring order and settled government to that unhappy country, is the opinion of the Rt. Hon. Sir Charles Hobbess, postmaster-general in the Asquith government from 1914 to 1915, and member of parliament for Bristol from 1900 until the Liberal defeat in 1918.

Sir Charles is staying for a few days on his way back to England. He has been making an exhaustive examination of the immense tract of land known as the Bannockburn, developed by the Canada Land and Irrigation company, of which he is the president.

The Irish people were so completely out of hand now that it would be a very wise man who could predict what the end would bring forth, so chaotic were conditions there, Sir Charles said. He did not hold out much hope for the conference of London, that is being held near Dublin, so long as the extremists remained outside. The problem was too deep-rooted to be settled in this way.

Sir Charles showed that he was keenly interested in the statement of policy recently enunciated by Mr. Meighen, but he thought that in supporting such principles, the government was riding for a fall in the next election. He showed his first belief in free trade in England when he stated with emphasis: "The war has taught the English people that high prices are the result of restricted importation. A tariff means restricted imports. They want no tariff."

## End of the C.E.F.

Will Carefully Preserve All Documents Relating to Ex-Members Of The Army

Ottawa.—The Canadian expeditionary force is no more.

The fourteen N.C.O.'s who were employed to compile the statistical work of the army have written "30" on the concluding page of a mass of papers relating to every unit and every man who ever donned a Canadian uniform. Just the number of records of the Canadian Expeditionary Force will come as a surprise to even the soldier whose records they are. The militia department has original and duplicate of about twenty-one forms relating to every one who served. Asked what was going to be done with the thousands of duplicate forms, a militia department official stated that they would be carefully preserved and locked away.

## Peace Delegates Want Food

Warsaw.—The Polish peace delegates at Minsk are hungry. An urgent appeal has been received by the ministry of foreign affairs asking that food be sent immediately to the delegates.

As indication that the Minsk conference was becoming indefinitely postponed, preparations are being made to send there five young women stenographers. They have been asked for by the delegates.

## Successfully Plug Gas Well

Calgary, Alta.—The gas well of the Canadian Cement company, which has been blowing wild for five or six years, has been finally plugged by officials of the mining lands, and the gas of the Dominion government, after efforts of noted engineers from all over the continent had failed. Over 100,000 cubic feet of mud was pumped into the well.

## Intoxicated Driver's Severe Sentence

Hamilton.—Wilfred Perry, of Toronto, arrested on a charge of drunk while in charge of an automobile, was severely punished by Magistrate Jeff.

He was fined \$20, and sentenced to 30 days on the first count, and for having a bottle of liquor in his possession, sentenced to 10 days on the second count, for a total of 40 days.

## Join One Big Union

Winnipeg.—The Winnipeg street railway men's union has ceased to exist as an independent organization. It has been merged with the Canadian registered a solid vote for direct affiliation with the One Big Union. The organization will be known as the Street Railwaymen's union of the One Big Union.

Belfast.—Eleven men dead and over forty wounded in the toll of the recent fighting in Belfast. In addition to those killed during the height of the battle, many of the wounded died.

A feature of the rioting was the extent of the destruction of property by incendiary bombs. The fire brigade had a very busy time during the night fighting the flames. Their work was rendered hideous by the constant rain of incendiary bombs. The Sinn Feiners were in strong force and appeared to be well supplied with arms and ammunition.

The greatest bitterness was displayed during the fighting. There was a great amount of wrecking of houses and the burning of furniture, both indoors and on the street. The yells of the mob, and the shrieks of the women and the children and the groans of the wounded, were heard throughout the fighting. When the rioting was at its worst, women could be seen attempting to lead their families out of the danger zone. The excitement was intense until Sunday morning. Isolated firing was heard throughout the forenoon, and the people were fearful lest there should be a renewal of the disorders at nightfall.

The attempts were made to burn the Independent Labor Hall. The last attempt resulted in serious damage to the building. A large number of charged crowds in the Crumlin road with their batons, but order was not restored until the soldiers arrived. It is said a boy was shot through the breast. Two constables are declared to have been sent to hospitals as a result of their injuries.

Bullies, who were in Belfast, responded to the lord mayor's appeal and remained fairly quiet, but in the next election he showed his first belief in free trade in England when he stated with emphasis: "The war has taught the English people that high prices are the result of restricted importation. A tariff means restricted imports. They want no tariff."

Later in the evening the battle was shifted to the northern part of the city, by the force of Townsends, and four thoroughfare extending from the Falls to Old Lodge road.

## Dealing With Soldiers' Problems

Well Over A Million Cases Deal With By S. C. R.

Ottawa.—Some interesting details of the work of the soldiers' civil re-establishment department are furnished in a statement just issued. The total number of enquiries and problems dealt with and directly affecting the welfare of the soldier is 1,218,472, and this, up to the present time.

It is expected that before the bulk of the work is completed, which will be about the end of the present year, this total will run to one million and a half.

It is expected that before the bulk of the work is completed, which will be about the end of the present year, this total will run to one million and a half.

The statistics show that the total number of men who have received medical treatment with pay and allowances is 98,890, the total number of clinical treatments is 422,223, the total of dental operations is 84,576.

## Purchase by Manitoba Farmers

Winnipeg.—One of the most important farm land deals negotiated during the past few months has been concluded. Senator Aime Brind and F. Lafleche acquired the Strathcona farm for \$150,000.

## 500 on Strike Over \$5 Dispute

Sydney, N. S.—Because of a dispute over an employee time sheet, involving a sum of about five dollars, 500 miners are on strike at Glace Bay. No. 9 colliery, one of the most important productivity of the district is idle.

# The Noble Foundation Said to be the Largest Grain Farm in the World

To stand in the midst of a single field of wheat and not feeling but what as far as the eye can see, to see dozens of binders tearing through the greatest single stand of grain ever seen in the west, is the experience of those who visit the Cameron ranch at the Noble Foundation, 20 miles northwest of Lethbridge, Alberta, while cutting is in progress on the 9,000 acre wheat field.

Three years ago this immense field of grain was laid virgin prairie, now it is yielding up its first big harvest of wheat at an average of between 25 and 30 bushels to the acre over the whole area. C. S. Noble, who heads what is known as the largest grain farming company in the world, started years ago with a section of land—320 acres. Today his holdings total 33,000 acres on all his farms, and he has a clear title to every acre of this. Of this area he has 26,680 acres cultivated, 712 are understock and 3,600 are used for grazing purposes. This year he has 18,287 acres in crop in all grains. Of this, there is 12,310 in wheat, 2,296 in oats, 3,517 in rye and 70 in flax. He has shown his faith in winter grain as a means of combating soil drifting by planting a great deal of it. He has on one farm 100 acres of volunteer rye which yields eight bushels, another field of 1,000 acres of volunteer wheat which yields to yield more, 70 acres of rye that will yield 21 bushels, and 80

acres that will yield 25 bushels. He also has 20 acres of flax which will yield 30 bushels.

The majority of the crops this year are what is known as the Cameron ranch, where there are 9,000 acres in wheat, 2,300 acres of rye, 1,500 acres of oats and 70 acres of flax. It is expected that the total acreage will yield 307,350 bushels of wheat, 400 bushels of oats, and 70,340 bushels of rye, worth roughly about one million dollars. To harvest this immense crop of binders are at work, using 240 horses in addition to the enormous number of helpers required to carry on the necessary work.

To save a fifteen mile haul from ranch to railway, Mr. Noble has established a unique system of conveyance in what over the city of the Little Bow River, two miles away, by aerial tramway to the south side, where another three miles will put the grain into the elevator he has purchased.

A huge granary on the slope of the coule at the Old Man River has been built with a capacity of 50,000 bushels. As the grain goes in this it comes out at the foot in a chute which carries it into a huge carrier again. The grain is then carried to a hopper on the other side from which chutes lead to the elevator, the whole operation being done by gravity.

## Alberta's Telephone Service

Albert Business Has Grown by Leaps and Bounds

Within the next three months a thousand new phones will be added to the city telephone exchange of Calgary, Alberta. During the past six months the exchange has been able to expand sufficiently to keep up with the increased demands of new subscribers. New equipment, however, is now being installed which, when completed, will allow an additional thousand installations to be put into use. It is however apparent that still further extensions will have to be made shortly since there are now sufficient subscribers on the waiting list to absorb the greater number, if not all the additional telephones the company they are ready for.

If the growth in city phones has been small, because of lack of equipment, the growth in rural services has been very large. The new directory for Calgary and district shows 21 new rural toll stations opened up during the last directory was issued and five additional rural toll stations west of Red Deer taken over by the government.

"The rural business has grown by leaps and bounds," states the official in charge of the district. "There are more than a score new toll stations in the new district, and in a month there will be as many more ready to open. It is difficult to estimate what the gain will be to the individual service in this district, since the work on the various toll lines is not complete. The gangs are working with all speed to complete the new lines and by fall the number of additional rural services will be very great."

The new toll offices opened in the Calgary district, which included from Red Deer south to Carmangay, ask for cash, as follows: Patricia, Mapleview, Watte, Del Bonita, Valleyfield, Hake, Ranier, Judson, Leger, Skiff, Condon, Wrentham, Carleton Place, Cranford, and the new Rose Lynn, Stierness, Sunny Nook and Allerton.

## Canadian Coal For Europe

A ship recently left British Columbia for Sweden with 4,500 tons of coal and it is expected that, owing to the opening on Atlantic ports, there will be further large shipments from the Pacific if bottoms can be secured. The Canadian Coalfields at Nanaimo, B. C. which shipped this coal, is in a position to export large quantities, and with the prices obtainable in Europe, will likely do so. At present prices of coal in British Columbia are lower than anywhere in the world, it is claimed.

## 12,000,000 Pounds of Butter

The production butter in Alberta 1929 will, in all probability, reach twelve million pounds, W. M. Prevett, secretary of the leading butter-makers in central Alberta predicts.

Some people like the town without doing very much to make the town like them.

## Experiments in Swine Feeding

Self-Feeder Proves More Economical Than Trough Method

Experimental work with swine has been underway at the Scientific Society for three years. The list of experiments includes a comparison of the methods of housing, comparison of feeds and methods of feeding, and determining the value of pasture.

One of the first points noted in examining the data collected is that while raising and feeding has proven profitable during this period, notwithstanding the high cost of feed and labor. Out of all the experiments tried out only one has shown a direct loss and this was due to poor results in the building in which the hogs were housed and consequent illness.

The information secured indicates that profitable gains can be secured by use of the self-feeder. In most of the experiments the self-feeder has resulted in more economical gains than the trough method. The conclusion reached is that where the feeder is used in his business he can secure equal gains with the self-feeder method, but where the feeder is not well versed in the art of feeding then the self-feeder method permits the hog to use sufficient quantities of feed to permit vigorous growth.

The matter of pasture for swine is a debatable one. It is possible that very young pigs will make more rapid gains if green feed is cut and fed them than if they have the run of a large pasture. On the other hand, the cost of maintaining broad pastures will be substantially decreased by the use of pasture.

A comparison of wintering swine in a large central building with that of having the swine in small able cabins has shown the small cabin to be the most profitable since it is an easy method to have the run of the pigs in the small cabin while in a large central pigsty this frequently occurs. Breed shows that have wintered in small cabins some distance from the feeding trough have always produced good strong vigorous litters.

A point that has been put up particularly during the last few years is the importance of having grain of good quality for feeding. Swine is more important than most people realize. That the feed plays an important part in the success of the operation is conducted this winter when barley and oats were fed in direct comparison with standard screenings and cuts, and shorts and culls. The feeding value of the first material was considerably superior to either of the others. While the shorts and culls produced the least gain, the gain was not as great.

Owing to the high prices usually prevailing for wintering swine, it is a good idea to have early fall litters wintered in straw sheds or in portable cabins have been raised under the most favorable conditions similar to those existing on the average farm, the feed was available and the feed-meistered of water and grain, with out shaver for roughage, and when available roughage was given plenty of corn. These pigs were raised under conditions that did not make very rapid gains during the extremely cold weather they filled out rapidly once the warm spring weather set in, and a couple of weeks of the self-feeder resulted in wonderfully rapid gains.

In conclusion it might be pointed out that swine raising, like all other lines of business, must be conducted carefully and carefully conducted. Much of the loss from this branch of farming in the past has been due to farmers and others going into the business for a few dollars and not having the first sign of a slump in the market disposing of their stock.

MILTON J. THRELKELD, Superintendent.

Scott, Sask.

## Floods at Lesser Slave Lake

Water Does Serious Damage to Hay in the North

Thousands of acres of hay in the region of Lesser Slave Lake, covered by several feet of water, and in danger of this vast expanse of stock feed being ruined is apparent according to J. A. McGregor, general manager of the E.D. and B.C. Railway.

The situation caused by the Lesser Slave Lake rising fully five feet above normal level is a serious one, says Mr. McGregor, and fairly starts in the immediate action in Savard. The water is well into the town of Sawmills, and the water in the lake, on the opposite side of the lake, can only be reached by boat.

The less work a man does the more he tries other people.

## Beaver Ranching In Canada

High Prices of Furs Results in the Domestication of the Beaver

The conservation of wild life on the continent and the domestic cultivation of wild animals for their fur has been receiving widespread attention and encouragement both on account of the high prices prevailing and also in order to offset the natural depletion by trap, gun and disease. The culling of a thirty-year grazing lease to Vilijamur Stefansson on the southern prairie of British Columbia, to raise reindeer and caribou is an indication of this, while the formation of moose farms has been much advocated on account of the profitable nature of the industry, a prominent factor of which is the economic maintenance of such an industry.

The rapid decline of the beaver has been the content and consistent high prices for the fur of these animals have drawn attention in their direction, and the feasibility of domesticating the beaver, rather than culling the animal in its wild state under domestic restraints, is receiving much consideration. A beaver ranch was established last fall on the ranch of H. Cole, a farmer of Milton, Prince Edward Island, his first pelts were sold for \$100 to \$600.

The location for the ranch was an admirable one—the animals' natural haunts with abundant flowing water and a good provision of natural sustenance. The busy little animals went right ahead with their dam-building, and in using the dam to close them and prevent possible migration did not apparently annoy them to any extent, and they continued to procreate and follow out their regular routine as if unhampered by the schemes of man.

The beaver, which was early recognized as a typically emblematic of Canada from its ubiquitousness, found a permanent memorial on the map when the supply of beaver to be found in every part of the Dominion. It usually disappears with settlement, however, and statistics go to show that the supply of beaver in the wild is rapidly diminishing, and that in a matter of twenty years will, unless conserved by the establishment of farms, have followed the buffalo into practical oblivion and extinction.

Beaver ranching is an industry that would receive every encouragement. The trapping of beaver has always been a profitable pursuit while the high price of the fur which will doubtless hold, is sufficient encouragement. Given a careful choice of location, a ranch is economic of operation and can be probably run on lines of little expense, after the initial outlay.

## Japs Carving World's Largest Statue

Will be Reaching Figure 240 Feet Long

On the Isle of Cow's Head, in that beautiful inland sea, which has been the scene of the destruction of Japan, a ledge of rock overlooks the water, and here a small army of Japanese artists are busy at the first cuttings that will eventually carve out the largest statue in the world. The Colossus of Rhodes, at one time one of the seven wonders of the world, is said to have been 120 feet high, a small thing compared with the figure of Liberty that stands 151 feet above its pedestal in New York harbor—but the Japanese statue will be of even greater magnitude. Following the line of the natural rock it will be the Buddha of the future, and it is said to be a reclining figure 240 feet long, and therefore that much more impressive than the Buddha at Pegu, Burma, which from head to foot measures 182 feet. The Isle of the Cow's head is private property, this Reclining Buddha is a work of private enterprise. The reclining figure will be that of St. Nicholas, who founded the sect of Buddhism that is now the dominant religion in the island of the saint. His statue, facing whoever sees him, his head pillowed on a block, and his left arm extended along the side of a somewhat similar figure, yet with considerable realism. For the enormous statue that is to be cut out of the solid rock from under the trees and greenery of the Isle of Cow's head will provide an excellent setting.

Police

"Oh, Charlie, I'm so worried! You know you told me to take that piece of wedding cake under my pillow and I'd dream of my future husband!" "Yes, dear, didn't I?" "I dreamed of the Seventy-first regiment."

Norwegian and Danish languages are almost similar save in pronunciation.

## Heavy Decline in Wheat Growing Shown Since Pre-War Days

The average world's yield of wheat the war years 1914 to 1918 is ascertained to be 98.3 million metric tons, a quantity slightly below that of the average six years when the average crop was 100.6 metric million tons, says a recent communication from the International Institute of Agriculture, Rome. It might appear from the respective aggregate that the war had not seriously affected wheat-growing, but in reality matters are quite otherwise. The official data published by the Institute record the profound influence of war with regard to cultivation of wheat in Europe and in other continents. Such attempts as were made by European governments to insure adequate crops proved unsuccessful. In spite of all inducements offered to farmers, and of the many obligations imposed upon them, with the view of keeping up the wheat area, there was a decrease from 135,000,000 acres in 1913 to 112,000,000 in 1918, and from an average of 380,000,000 during 1909-13 to 314,000,000 during 1914-18. In other words, a decline of about 10 percent. The data of yields indicate a decrease even more serious than that.

While the aggregate yield in 1913 was 57.5 million metric tons, the figure shows sharp declines, to 41.3 million metric tons in 1918, while the average of 52,000,000 metric tons during the pre-war years decreases to 41.6 million metric tons.

## Lignite Development In Saskatchewan

New Company Incorporated as the Western Collieries, Limited

A company capitalized at \$500,000, has been organized for the purpose of developing a part of the Saskatchewan lignite fields in the Estevan district. The new company has been incorporated in the province as the Western Collieries, Ltd., and arrangements already have been made for the commencement of operations.

The company's first operations will consist of 630 acres at Roche Perce, nine miles southeast of Estevan. The mine will be developed on a scale that will permit it to be proposed to establish a large brick pressing plant which will be operated during the summer months and to help to keep the labor of the mines engaged throughout the entire year.

Reference to government reports there is in this district some of the finest clay in the world suitable for brick making. The slack lignite coal will be utilized in the burning of these bricks which it is estimated will allow of economical production.

## Distribute Season's Fish

Dominion Government Fisheries Distribute Fry in Manitoba

And B. C. Streams

The fisheries branch of the department of marine and fisheries of the Dominion government announces that the Manitoba hatcheries have completed distribution of fry for the season, the total liberated numbering 224,465,850. Of these 25,535,000 were pickered and the balance whitefish. With some few exceptions, the distribution of fry has also been completed in British Columbia. In that province, 114,079,487 fry have been liberated, chiefly of the various species of the whitefish family. Approximately 740,000 of Kennerley's salmon fry distributed within British Columbia.

## A Quiet Support Partner

The evening party was over and most of the guests had gone, so the hostess said to her young man who took leave of the hostess the lady said: "I'm sorry you found Miss Bingle a poor conversationalist!" "exclaimed the guest. She's absolutely the limit. Why, the only thing she said to me during the entire evening was, 'No', and I had to propose to get that out of her."

## Advantage of Depreciated Currency

Because currency has become so depreciated and the price of farm products so high, a Hungarian farmer decided to pay off the mortgage on his land by the sale of one calf, according to a report to the department of commerce from a trade representative at Vienna. About 20 percent of the farm mortgages have been paid off in depreciated currency since the war, and almost similar case in pronunciation.

tion for the five season of conflict, or more than 10,000,000 (20 percent) below the previous crops. The gravity of this situation as regards Europe was fully appreciated overseas, and with one accord every region entered the world-wide co-operation in order to save from hunger hundreds of millions of war-worn people, doing its utmost to furnish Europe with its indispensable requirements. Thus we may observe that North America increased its wheat area from the pre-war average of 55,000,000 acres to about 70,000,000. Asia advanced from 45,000,000 to 53,000,000, and Australia from 7,000,000 to 10,000,000, in wheat acreage. Such attempts as were made by European governments to insure adequate crops proved unsuccessful. In spite of all inducements offered to farmers, and of the many obligations imposed upon them, with the view of keeping up the wheat area, there was a decrease from 135,000,000 acres in 1913 to 112,000,000 in 1918, and from an average of 380,000,000 during 1909-13 to 314,000,000 during 1914-18. In other words, a decline of about 10 percent. The data of yields indicate a decrease even more serious than that.

While the aggregate yield in 1913 was 57.5 million metric tons, the figure shows sharp declines, to 41.3 million metric tons in 1918, while the average of 52,000,000 metric tons during the pre-war years decreases to 41.6 million metric tons.

## Experiments With An Eighty-Day Wheat

Well Suited To Districts Where Any Other Varieties Have Not Been Successful

A new variety of wheat called "Quality" which ripens 80 days, is being grown very successfully at Douglas, Manitoba by W. J. Whitley, who has been experimenting with its possibilities, and in this new wheat believes that he has wheat that will give a new standard for Canadian grain. Any event it appears to be very well suited to certain districts where other varieties have not been so successful. The wheat is adaptable to any climate it is claimed, and can be successfully grown in a light soil. It is more resistant to rust than Northern wheat, "Price Marquis," has a vitreous white berry of quite different appearance and quality. The seed are of medium size, tapering to a point, beardless, and on ordinary stand three and a half feet in height.

Mr. Whitley has also been experimenting with a new kind of barley which thrashes out exactly like the old variety. It is a new variety, which has been developed with success with white flax seed which has yielded twelve percent more oil than ordinary flax, and the seeds are nearly double the size of ordinary flax.

## A Suburban Millionaire

Says Idle Rich are A Curse to Society

And Humanity Alike  
In a small villa at Forest Hill, near Toronto, lives a millionaire without servants or assistants, his wife doing all his householding. He is Mr. G. L. Moore, who, beginning life as a solicitor's clerk in Belfast, ultimately moved to London and carried out numerous financial ventures.

Everything he touched turned to gold, and today he is interested in two hundred and fifty different companies, all his business is handled by his wife. Mr. Moore intends to devote his life to philanthropic pursuits, and has offered £10,000 for a park. He is desirous to die poor.

Wealth has left him quite unbalanced. He still gets up at three o'clock every morning, works in the city all day, and goes to bed at seven-thirty. Rich people who live pampered lives are a curse to humanity and society alike. It is the view he holds.

## The Farm Family

The farm family, because of its comparative remoteness from the turmoil and distractions of the city, has wonderful opportunities to make a real home. In Hungary, a farmer is that of beautifying the farmstead so that it may be more attractive to the occupants. The tendency to make both young and old more contented, will add materially to the enjoyment of those who stay by, and especially to the selling value of the farm."

W. N. W. 1331.

## INSIST ON GETTING THE BEST: The Best Is The Cheapest In The End

If you wish to retain the affection  
Of that grinch of a hubby of thine,  
Dish up tasty meals of perfection,  
And he'll pronounce you a lady divine.

He'll shield you from all earthly care,  
And fill your heart with glowing hope,  
And never resist your womanly charm,  
If you feed him well on the proper dope.

Buy the best there is in all the land,  
And place before him a varied pile.  
Such are the goods we have on hand  
At the Busy Store, the Mercantile.

Ladies, ask to see the Latest Styles we have in Waists, Blouses & Skirts.

Do you really consider the welfare  
Of the woman you made your wife?  
Does she carry a load of worry and care,  
With little or no pleasure in life?

Remember how neatly she dressed,  
And how great was the appeal of her charm  
When on her own name you pressed  
And promised to shield her from harm.

You may still gladden her heart,  
And she's sure to lead in style,  
If supplied with the nifty things of art  
We sell at the Burdett Mercantile.

G. H. ROBINSON, Proprietor.

### Boot-legger breaks jail and steals car.

From our own Correspondent

Bow Island, August 27th.

Constable Bradner saw a car with a  
Saskatchewan Licence on the street  
No. 6284 he examined the car and  
found it contained a quantity of  
liquor the owner gave his name as  
Charles Stapleton of Gull Lake, Sask.  
Constable Bradner arrested the man  
and took the car up the police quarters  
the prisoner was slightly intoxicated,  
Constable Bradner got Mr. Hurst,  
Town Constable to help him, as the  
man refused to go along, after being  
secured behind the bars, Mr. Hurst  
said that he would see that he did not  
get out, Constable Bradner then went  
to get his supper and also thought he  
would take the spark plugs and coils  
out of the man's car, J.J. Brown J.P.  
came up the office and the police laid  
an information against him under Sec.  
23 of the Liquor Act, and also for carrying  
offensive weapons which the man  
had in his coat in the car, Mr.  
Hurst came up while the information  
was being laid and said that the man  
was still in the cell and that there  
was no fear of him getting out, al-  
though he said that the man had been  
kicking at the wood work by the side  
of the cell door and that he had told  
him if he did not stop kicking, then he  
Constable Hurst would have to put  
the shackles on him, shortly after just  
as the police were going down to the  
cells they met Mr. Reid, Mayor, out-  
side the office, who said, the man had  
got out of the cell, by pulling two  
boards off; the police got about twenty  
of the citizens some with cars and  
some on foot to look for him; Mr.  
Carlson said he saw him going south  
past the police quarters and said that  
he was walking fast, and said that he  
had no coat or hat on, some went  
south with Constable Bradner but  
found no trace of him, but afterwards  
he was seen by Mrs. Bradner pulling  
at his car and had pulled it back about

thirty feet but while she went in to  
get a gun he was gone and was  
seen running east and dodging the  
police and helpers and while the men  
were searching in the empty house  
he must have been in locating a  
car, after discovering that his own car  
was so badly dismantled, for very soon  
Mr. Sevenson came up to the  
police quarters and said that his car  
had disappeared and that he believed  
that this man had stolen it and fled  
with it, the car was standing  
outside of Mr. Sevenson's hardware  
store, all detachments were  
notified, he had evidently had taken  
the west end at first, then back and  
went south, no doubt the man was  
bound for Montana as he had three  
Registration Certificates of the state  
of Montana amongst his effects, very  
soon after that they suspected that  
the man went south, Mr. Sevenson  
got a fast car and accompanied by  
Constable Bradner struck out for  
Foremost, they saw a head-light of a  
car south of the Forty Mile Coulee  
coming west but suddenly disappeared  
and could not be located, Mr. Sevenson  
said he believed it was his car  
from the lights. The man evidently  
travels under different names, and by  
appearances is a bad man and a  
dangerous one, it caused an excitement  
here that the citizens do not experience  
very often, up to the time of  
writing the man was still at large  
and the car with him

The next time the Boy Scouts are  
seen out it is expected they will have  
their drums and bugle with them.  
Kenneth Campbell is making quite a  
noise these days.

### Obituary

On Thursday August 19th, the com-  
munity was shocked to hear of the  
sudden death of Mr. Anselme Goldreich  
of Maleb. The late Anselme Goldreich  
was born at Wehrheim, Alsace  
Lorraine on January 10th, 1866. He  
came to United States after the  
Franco Prussian War at the age of  
seventeen.

In 1879 he enlisted in the United  
States Regular Army with which he  
served five years at Fort Citadel  
Dakota, after his release from the  
army he settled on a farm in Dakota  
where he remained until 1910 when  
he came to Alberta.

During his residence here he has  
always been known as a man of  
strictest integrity and will be greatly  
missed by his host of friends.

The deceased wished to mourn his  
loss his wife Pauline and the following  
children, Max of Bow Island, Mrs. E.  
J. Hines of Winona, Wis., Mrs. M.L.  
Hilbard of Los Banos, Cal., Ernest,  
Paul, Richard, Robert, Alice, and  
Mabel at home

Funeral services will be held at  
Maleb, 23rd. August 1920

The following floral tributes were  
sent by friends

Pillow by the family, Wreath Mr. and  
Mrs. W.G. M. L. and G.R. Bowen.  
Wreath U.F.W.A.

Sprays Mr. and Mrs. Smeal  
J. Neil  
R.M. Compergood  
J.M. Gibbons

Mrs. Goldreich and family wish to  
take this opportunity of conveying  
their thanks to the many friends who  
so kindly assisted them in their recent  
bereavement also those who con-  
tributed the floral tributes

## Burdett News

The run-away of last Thursday  
from Bow Island jail while on way  
to freedom, entered Mr. Edlund's yard  
where there was a shocking fight  
and helped himself to a liberal supply  
of gasoline taking also with him the  
good cans which had been purchased  
very recently at Mr. Ostrum's Store  
Burdett and made good his escape

Harvest work is now in full swing  
and already the grain is coming in;  
reports from all the different districts  
show that after all the various set-  
backs which the Farmers have had to  
contend with they will still have quite  
a good crop. The district south of  
Forty Mile Coulee is especially good

Harvest help has been plentiful,  
most of the Farmers have been supplied  
from Medicine Hat and a first class  
stamp of men they have proved

Two old timers have been seen in  
Burdett lately, Wm. Reiser who has  
just returned to look after his various  
interests here and John Still, both  
seem quite glad to be back

Had it not been for the large  
Headers employed a large part of this  
crop would have been lost, but now  
they are almost through, the sight of  
the large stacks makes the country  
side look fine.

Miss Anderson has just returned  
after her usual vacation, she is again  
in the Teller's box at the Standard  
Bank.

Major Small evidently finds the  
attractions of Burdett too strong and  
after a trip to the mountains is with  
us once more, and his many friends  
hope it will be for good.

The new building for the Standard  
Bank is progressing fast.

A number of men have been busy dur-  
ing the past week excavating and get-  
ting the foundation ready, when com-  
pleted this will be quite an asset to  
the town

We notice the Rev. Perry Johnson  
is now running a brand new Chevrolet  
car, this enables him to get round  
his large district easily.

During the harvest he finds many of  
his congregation are unable to attend  
the services, but as soon as the reek is  
over he will no doubt have large  
crowds to hear him. His ministra-  
tions are already being much appreciated.

Attention of the local Veterans is  
called to the fact that there will not  
be a meeting on September 1st, this  
being postponed till the first Sunday  
in October

School opens here next Tuesday  
with new teachers, with the exception  
of Principal Spackman who is expected  
to return with his bride.

A local supper was held in the L.D.  
S. Church Tuesday last, songs, stump  
speeches and recitations were given  
after a large supper was partaken of,  
everyone having an enjoyable time

### Winnifred

From our own Correspondent  
Mr. Hills of Medicine Hat visited  
his son Frank Hills between trains

Mr. and Mrs. D. Champion of Orion  
were visitors at the home of Mr. and  
Mrs. E. Krendall, Mrs. Kendall and  
family accompanied them back to  
Orion to visit for 10 days

Mrs. Pedersen, Miss Valva Pedersen  
and Mrs. Nordman of Pleasant View  
visited with Mrs. Bushing Tuesday  
afternoon

Mr. and Mrs. Puffer of Winnifred  
motored to Medicine Hat last Wed-  
nesday
